

DON'T IGNORE the signs of a MINI STROKE

What is a TIA (mini stroke)

A TIA is similar to a stroke but symptoms may only last a few minutes.

**A TIA should be treated as an emergency. Don't ignore it!
Contact your GP TODAY.**

Signs of a TIA

Symptoms may include one or more of the following:

- weakness or clumsiness of hand, arm or leg
- difficulties with speech
- difficulties with swallowing
- numbness or pins and needles
- brief loss of vision, or double vision
- symptoms may last for 2-15 minutes but go completely in 24 hours

**If you
have
had a TIA
